Continuation of 2. NOTE: The proposed amendments to claims 13-14 to include a diffusion barrier film would require further consideration and/or search. Although claim 9 claims a similar diffusion barrier film, it has additional structural features, namely the inclusion of a plug for electrical connection between two such layered interconnect structures.

Continuation of 5. does NOT place the application in condition for allowance because: Regarding the rejection of claims 13-14 under 35 USC 103, the applicant's arguments with respect to the teachings of Hussein et al. are based on the proposed amendment being entered. Regarding the applicant's contention that the teachings of the IBM Technical Disclosure Bulletin have been interpreted to broadly, it is noted that this disclosure recognizes that rhenium, osmium, ruthenium, and iridium can be used in interconnect as well as contact applications and that they are excellent barriers against the diffusion of copper.

Continuation of 10. Other: The proposed amendments to claims 1, 3, 5, if entered, would be sufficient to overcome the rejection to claims 1-6 under 35 USC 112, second paragraph.
